Education

Indian Institute of Technology Patna

Aug 2024 – July 2027

B.Sc. in Computer Science (Specialization: Data Analytics)

CGPA: 9.47/10

Relevant Coursework: Data Analytics, Machine Learning, Artificial Intelligence, Probability & Statistics, Web Development

Skills

Programming Languages: Python, SQL, R

Analytics: Microsoft Excel, Power BI, Statistics, Data Analysis, Data Cleaning, Data Visualization, Exploratory Data Analysis (EDA), Business Intelligence

Frameworks/Libraries: NumPy, Pandas, Scikit-learn, Matplotlib, Plotly

Databases: MySQL, PostgreSQL, Microsoft SQL Server

Tools: Git, GitHub, VS Code, Jupyter Notebook, SQL Server Management Studio (SSMS)

Professional Experience

Guru Gobind Singh Indraprastha University (GGSIPU)

Jan 2026 – Apr 2026

Winter Research Intern

- Developed an end-to-end **OCR-based document processing pipeline** using **Python** to extract **structured data** from scanned financial documents, improving document digitization efficiency.
- Automated **data extraction** and **preprocessing workflows** (denoising, normalization, binarization), enhancing **data quality**, extraction accuracy, and reducing manual effort.
- Performed **data validation**, **performance analysis**, and **error analysis** to ensure reliable and accurate document processing outputs.

Academic Projects

Marketing Campaign Performance Analytics

- Analyzed **100K+ marketing campaign records** using **SQL** and **Python** to evaluate **campaign performance**, customer segments, and marketing effectiveness.
- Built an interactive **Power BI dashboard** to monitor **ROI**, **Conversion Rate**, **Customer Acquisition Cost (CAC)**, **Click-Through Rate (CTR)**, and other key **KPIs**.
- Performed **customer segmentation**, **A/B testing**, and **trend analysis** to generate **business insights** and optimize marketing campaigns.

Credit Card Customer Analytics Dashboard

- Analyzed **credit card transaction data** using **SQL** and **Python** to identify customer spending patterns and portfolio trends.
- Developed an interactive **Power BI dashboard** to track **monthly spending**, **revenue KPIs**, **Customer Lifetime Value (CLV)**, and merchant category performance.
- Applied **RFM-based customer segmentation** to identify **high-value** and **at-risk customers**, supporting customer retention and portfolio optimization.

Customer Churn & Retention Analytics

- Built a **customer churn analytics solution** using **SQL**, **Python**, and **Power BI** to identify key factors influencing customer attrition.
- Performed **Exploratory Data Analysis (EDA)**, **feature engineering**, and **statistical analysis** to uncover churn patterns and customer behavior.
- Designed interactive **KPI dashboards** to monitor **Churn Rate**, **Retention Rate**, **Customer Lifetime Value (CLV)**, and revenue impact while recommending data-driven retention strategies.

Achievements

- **Winner** – HackWithUttarPradesh, India's 2nd largest AI hackathon, among **400+ participants**.
- **Runner-up** – HackWithCBS, one of the largest student-run hackathons, among **200+ participants**.
- **Top 10 Finalist** – HackNauts National Level Hackathon among **200+ participants**.
- Completed a certification in **Data Science and Generative AI** from **PW Skills**, covering **Python**, **Machine Learning**, and **applied AI** concepts.
- Earned a **5-Star SQL Badge** on **HackerRank**.
